Classrooms and Clinics Richard A. Meckel, 2013-11-07 *Classrooms and Clinics* is the first book length assessment of the development of public school health policies from the late nineteenth century through the early years of the Great Depression Richard A Meckel examines the efforts of early twentieth century child health care advocates and reformers to utilize urban schools to deliver health care services to socioeconomically disadvantaged and medically underserved children in the primary grades Their goal Meckel shows was to improve the children s health and thereby improve their academic performance Meckel situates these efforts within a larger late nineteenth and early twentieth century public discourse relating schools and schooling especially in cities and towns to child health He describes and explains how that discourse and the school hygiene movement it inspired served as critical sites for the constructive negotiation of the nature and extent of the public school s and by extension the state s responsibility for protecting and promoting the physical and mental health of the children for whom it was providing a compulsory education Tracing the evolution of that negotiation through four overlapping stages Meckel shows how why and by whom the health of schoolchildren was discursively constructed as a sociomedical problem and charts and explains the changes that construction underwent over time He also connects the changes in problem construction to the design and implementation of various interventions and services and evaluates how that design and implementation were affected by the response of the civic parental professional educational public health and social welfare groups that considered themselves stakeholders and took part in the discourse And most significantly he examines the responses called forth by the question at the heart of the negotiations what services are necessitated by the state s and school s taking responsibility for protecting and promoting the health and physical and mental development of schoolchildren He concludes that the negotiations resulted both in the partial medicalization of American primary education and in the articulation and adoption of a school health policy that accepted the school s responsibility for protecting and promoting the health of its students while largely limiting the services called for to the preventive and educational

The Creep Michael LaPointe,2021-06-01 A deep weird and uncanny tale Sheila Heti A book to devour Iain Reid Sinister good fun Lee Henderson Gripping and unassumingly smart Lauren Oyler A journalist with a history of bending the facts uncovers a story about a medical breakthrough so astonishing it needs no embellishment but behind the game changing science lies a gruesome secret A respected byline in the culture pages of the venerable New York magazine The Bystander journalist Whitney Chase grapples with a mysterious compulsion to enhance her coverage with intriguing untruths and undetectable white lies She calls it the creep an overpowering need to improve the story in the telling And she has a particular genius for getting away with it In the immediate aftermath of 9 11 Whitney yearns to transition from profiling rock stars and novelists to covering the stories that really matter When a chance encounter brings her face to face with a potentially massive story about a game changing medical discovery Whitney believes she s finally found a story that doesn t need any enhancement The brilliant and charismatic doctor behind the breakthrough claims she s found the Holy Grail of medical science a synthetic blood substitute that if viable promises to save millions of lives and make her corporate backers rich beyond measure But when Whitney s investigation of this apparent medical miracle puts her on the trail of a string of grisly fatalities across the country she becomes inexorably tied to a much darker and more nefarious story than even she could imagine Set against the ramp up to the US invasion of Iraq and the decline of print journalism Michael LaPointe s panoramic ingeniously plotted debut paints an affecting portrait of an increasingly unequal twenty first century exploring how deceitfulness self enhancement and confidently delivered lies can be transfused into fact and constitute a broader violence against the social fabric and public trust
