The Oxford Handbook of Laboratory Phonology Abigail C. Cohn, Cécile Fougeron, Marie K. Huffman, 2012 This book provides state-of-the-art coverage of research in laboratory phonology. Laboratory phonology denotes a research perspective, not a specific theory; it represents a broad community of scholars dedicated to bringing interdisciplinary experimental approaches and methods to bear on how spoken language is structured, learned, and used. It draws on a wide range of tools and concepts from cognitive and natural sciences. This book describes the investigative approaches, disciplinary perspectives, and methods deployed in laboratory phonology and highlights the most promising areas of current research. Part one introduces the history, nature, and aims of laboratory phonology. The remaining four parts cover central issues in research done within this perspective, as well as methodological resources used for investigating these issues. Contributions to this volume address how laboratory phonology approaches have provided insight into human speech and language structure and how theoretical questions and methodologies are intertwined. This Handbook, the first specifically dedicated to the laboratory phonology approach, builds on the foundation of knowledge amassed in linguistics, speech research, and allied disciplines. With the varied interdisciplinary contributions collected, the Handbook advances work in this vibrant field.

The Dawn of Language Sverker Johansson, 2021-09-02 A model of popular science writing. STEVEN POOLE Who was the first speaker and what was their first message? An erudite, tightly woven, and beautifully written account of one of humanity's greatest mysteries: the origins of language. Drawing on evidence from many fields, including archaeology, anthropology, neurology, and linguistics, Sverker Johansson weaves these disparate threads together to show how our human ancestors evolved into language users. *The Dawn of Language* provides a fascinating survey of how grammar came into being and the differences or similarities between languages spoken around the world before exploring how language eventually emerged in the very remote human past. Our intellectual and physiological changes through the process of evolution both have a bearing on our ability to acquire language. But to what extent is the evolution of language dependent on genes or on environment? How has language evolved further, and how is it changing now in the process of globalisation? And which aspects of language ensure that robots are not yet intelligent enough to reconstruct how language has evolved? Johansson's far-reaching, authoritative, and research-based approach to language is brought to life through dozens of astonishing examples, both human and animal. In a fascinatingly erudite and entertaining volume for anyone who has ever contemplated not just why we speak the way we do, but why we speak at all. Translated from the Swedish by Frank Perry.

Law and the Human Body Rohan Hardcastle,2007-09-18 Do you own your body Advances in science and the development of genetic databases have added an aura of modern controversy to this long standing and as yet unresolved problem In particular English law governing separated human tissue including organs DNA and cell lines is unsatisfactory Despite the enactment of the Human Tissue Act 2004 UK it remains uncertain what property rights living persons can claim over tissue separated from their bodies The development of clear legal principles is necessary to protect the rights of individuals while also enabling the efficient use of such materials in medical research Part I of Law and the Human Body traces the evolution of English Australian United States and Canadian law in relation to human tissue separated from living persons and dead bodies This includes a comprehensive examination of the Human Tissue Act 2004 UK as well as prominent judicial decisions including Re Organ Retention Group Litigation 2005 QB 506 Colavito v New York Organ Donor Network Inc 8 NY 3d 43 NY CA 2006 and Washington University v Catalona 490 F 3d 667 8th Cir 2007 Analysis demonstrates that although property rights and non proprietary interests in separated human tissue are recognised in limited circumstances no principled basis has been accepted either at common law or by statute for the recognition of these rights and interests Part II of this book develops and defends a principled basis in English law for the creation and legal recognition of property rights and non proprietary interests in separated human tissue Significantly the analysis and principles presented in Law and the Human Body have application across common law and civil law jurisdictions worldwide

Pediatric Swallowing and Feeding Joan C. Arvedson, Linda Brodsky, Maureen A. Lefton-Greif, 2019-07-26 *Pediatric Swallowing and Feeding Assessment and Management Third Edition* provides information to practitioners interested in and involved with children who demonstrate swallowing and feeding disorders. Since the 2002 publication of the second edition, there has been an exponential increase in the number of medically fragile and complex children with swallowing and feeding disorders. A corresponding proliferation in the related basic and clinical research has resulted in the increased appreciation of the complicated interrelationships between structures and systems that contribute to swallowing, feeding, development, function, and disorders. Case studies throughout the book provide examples for decision making and highlight salient points. New to the Third Edition, Maureen A. Lefton-Greif, PhD, CCC-SLP, BCS-S, is welcomed as co-editor. She brings extensive research expertise and clinical practice in pediatric dysphagia and feeding. All chapters contain significant, updated, evidence-based research and clinical information. New chapters focus on genetic testing and conditions associated with swallowing and feeding disorders and the pulmonary manifestations and management of aspiration. World Health Organization (WHO) description of an International Classification of Functioning, Disability, and Health (ICF) sets the stage for an in-depth discussion of clinical feeding evaluation procedures, interpretation, and management decision making. *Pediatric Swallowing and Feeding* continues to be the leading text on pediatric dysphagia that provides practical information for clinicians seeing children with swallowing and feeding disorders. The overall importance of an appropriate fund of knowledge and shared experience employing team approaches is emphasized throughout this third edition, as in the earlier editions of this book. From the Foreword: The Editors have recognized the advances and changes in the understanding of the information now available for the care of pediatric swallowing and feeding challenges. They have recruited an outstanding group of contributors for this newest edition. There are numerous critically important updates and additions in the third edition. They have included the World Health Organization's International Classification of Functioning, Disability, and Health as the functional basis in all areas of the book. This text has its importance as there has been an increased number of children with complex medical and healthcare conditions which are at risk for feeding and swallowing disorders. This edition stresses the need for team approaches and also documents the use of virtual teams. *Pediatric Swallowing and Feeding Assessment and Management Third Edition* is the fundamental, holistic source for all healthcare providers providing the care for swallowing and feeding in children. This book will be utilized by all caring for children with feeding and swallowing problems throughout the world. The previous editions have been, and now this updated third edition continues to be, the standard source for the information concerning diagnosis and care of these children. Robert J. Ruben, MD, FAAP, FACS, Distinguished University Professor, Departments of Otorhinolaryngology, Head and Neck Surgery, and Pediatrics, Albert Einstein College of Medicine, Montefiore Medical Center, Bronx, New York.
