New Solutions for the Heart Bruno K. Podesser, David J. Chambers, 2010-10-28 Although cardiac surgery has made an enormous progress during the last decades, the discipline has to cope with essential changes. Patients are increasingly cared for by cardiologists and therefore referred to the surgeon in a later stage of disease. Consequently, they are more often in an increasingly serious state or in advanced age with significant comorbidities. In order to meet the requirements of these different patient groups, cardiac surgical treatments require special protection strategies for the heart in order to perform the planned operations safely. This book presents the latest knowledge of modern techniques of myocardial protection, taking into consideration the different patient groups and current scientific strategies. Furthermore, it discusses present and future scientific approaches in myocardial protection and preservation.
